

DECK NUT RDN

Self-locking Deck nut for channel fixing

RDN wedge nut ensures vibration-proof locking inside the deck sheet channel profile. Designed for fast assembly and dependable retention under load.

Application

- Designed for suspending services from composite decking.
- Specifically developed for TR60 decking profiles.

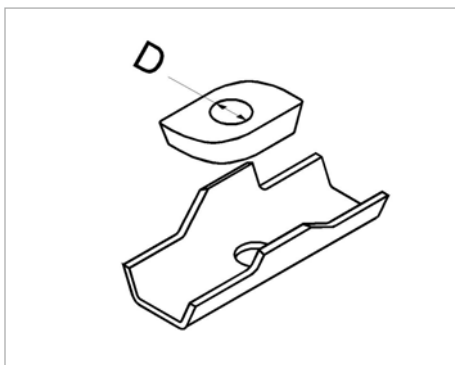

Material

- Steel grade-plate E-250, Ductile cast Iron Nut
- Coating – Electrogalvanized, Hot Dip Galvanized

Key Features & Benefits

- Provides a secure fixing point inside the dovetail re-entrant channel of decking profiles without drilling or welding.
- Avoids drilling, cutting, or weakening the decking profile.
- Allows precise positioning and alignment of threaded rods.
