

## TERRABASE RTBV

### Non-penetrating rooftop base system for secure modular mounts

The RTBV Terrabase system provides strong, adjustable support on terrace slab without roof penetration. Engineered for MEP layouts or equipment, it balances stability and flexibility in rooftop installations.

#### Application

- Installation of equipments and floor raised services on to the floor with non-penetrating mount system.

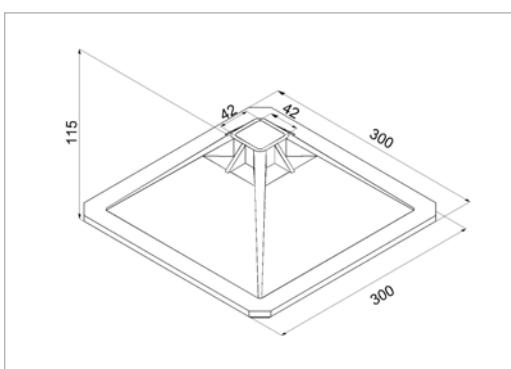

#### Material

- 100% recycled High Densely Polyethylene (HDPE) includes with an anti-vibration EVA pad

#### Key Features & Benefits

- Distributes the weight of the system uniformly across the structural member.
- The EVA pad reduces the vibration transferred to the system.
- Preserves the structural integrity by eliminating structural penetrations and potential leak points.
- Exceptional weather resistance for long service life.

## Product Variants

Item No.	Description	Length L (mm)	Height T (mm)	Width (mm)	Sales Unit (Pcs)
403700	Terrabase Vertical RTBV	300	115	300	2
